OBJECTIVE

First of all, I want to become a Senior Front-end Developer. So, I keep learning and working hard every day to make it come true. After I got that level, I will try to become a Full-stack Developer; learn the easiest way to mentor a new member,... And my last goal is learning to be a good manager.

That's all what I'm gonna do!

Work Experience

DELIVEREE (Oct 2021 - Now)

Front-end Developer

Logistics Web App

Description: A logistics platform to book a wide range of vehicles to transport goods for Philippines, Thailand and Indonesia customers.

Responsibilities:

- Follow up to refactor and fix a lot of bugs, which are reported by Sentry. That increase the performance by over 30% and improve the app's stability as well.
- Work with the back-end team to analyze the API that's needed to use.

Technologies: ReactJS, TypeScript, Ruby, Sentry, Google Map, Docker.

Shopify Plugin

Description: A web-app to provide the delivery services by connecting the users with Deliveree's drivers on Shopify.

Responsibilities:

- Make the app runs smoothly and stably.
- Work with Shopify's APIs to connect the app with customer's stores on Shopify.
- Maintain & manually deploy the app to ubuntu server with Docker.

Technologies: ReactJS, NodeJS, TypeScript, Docker, Ant Design, Google Map, Shopify Services.

XTEK (Sep 2018 - Sep 2021)

Front-end Developer

SOS Map

Description: An application to connect the people in difficulty with the donors during the Covid19 pandemic.

Responsibilities:

- Setup a new source code and implement all features.
- Optimize code to avoid the bad performance if showing more than 10,000 markers on the map.

Technologies: ReactJS, Ant Design, Styled Components, Goong Maps (goong.io).

CS9 Cryptocurrency Exchange

Description: The CS9's exchange application for crypto trading. It allows the users to buy and sell the crypto in minutes.

SKILLS

Summary: I have over 4 years of experience in HTML, CSS, JavaScript (ES6), ReactJS.

Others: VueJS (6 months).

Technicals:

- **Front-end:** Ant Design, Redux, React hooks, Styled Components, Firebase Cloud Messaging, Google Map
- **Others:** Git, TypeScript, Webpack, Babel, Docker, Cloud-server

EDUCATION

HUTECH UNIVERSITY

2017 to 2021

Major in Information Technology

Responsibilities:

- Add new features and fix bugs.
- Cooperate with the back-end team to create the API that's needed for the UI.

Technologies: ReactJS, Golang, Ant Design, Styled Component, Websocket, Docker.

Car Parking Management

Description: An desktop's application to give professional management for car parking. Includes: parking fee collection, parking guides and solving the congestion in the parking lot.

Responsibilities:

- Setup ElectronJS source code, add new features and fix bugs.
- Communicate with the back-end team to integrate APIs with the UI.

Technologies: ReactJS, Golang, Ant Design, Styled Component, Websocket, Docker.
