OBJECTIVE

First of all, I want to become a Senior Front-end Developer. So, I keep working hard every day to make it come true. After I've got that level, I will try a bigger plan. Besides, I'm learning and improving my English skills.

EDUCATION

HUTECH UNIVERSITY
2017 to 2021
Major in Information Technology

Work Experience

DELIVEREE (Oct 2021 - present)
Front-end Developer

Logistics Web App

Description: Southeast Asia's leading delivery logistics platform to book a wide range of vehicles to transport goods.

Responsibilities:
- Follow up and fix some bugs that were reported by Sentry, increase over 30% in performance.
- Work with the back-end team to analyze the API that's needed to use in the project.
- Refactor and optimize the source code.

Technologies: ReactJS, Ruby, Sentry, Firebase, Google Map, Docker.

Shopify Plugin

Description: A web-app's plugin to provide the delivery services by connecting the users with Deliveree's drivers on Shopify.

Responsibilities:
- Create API that's needed to use in the project and integrate it with the UI.
- Work with Shopify's APIs to connect the plugin with Shopify's stores.
- Made the plugin 3x faster by optimizing code.

Technologies: ReactJS, NodeJS, TypeScript, Docker, Ant Design, Google Map, Shopify Services.

XTEK (Sep 2018 - Sep 2021)
Front-end Developer

SOS Map

Description: An application to connect the people in difficulty with the donors during the Covid19 pandemic.

Responsibilities:
- Setup a new source code then add all features.
- Optimize code to avoid the bad performance due to show more than 10,000 markers on the map.

Technologies: ReactJS, Ant Design, Styled Components, Goong Maps (goong.io).

CS9 Cryptocurrency Exchange

Description: The CS9's exchange application for crypto trading. It allows the users to buy and sell the crypto in minutes.

⚙ SKILLS

Summary: I have Over 4 years of experience in HTML, CSS, JavaScript (ES6), ReactJS.

Technicals:
