RESUME

OBJECTIVE

First of all, I want to become a Senior Front-end Developer. So, I keep working hard every day to make it come true. After I got that level, I will try a bigger plan. Besides, I'm learning and improving my English skills.

PERSONAL SUMMARY

- Over 4 years of experience in HTML, CSS (+ responsive), JavaScript (ES6), ReactJS.
- Proficient use of Ant Design, git, redux (thunk & saga), hooks, styled-component.
- Good knowledge of NodeJS, docker, restAPI, socket, firebase, google map, TypeScript.
- Experienced with cloud, hosted server (linux) to deploy the product.
- Experienced with Agile/Scrum methodology.
- Good at problem solving and technologies researching.
- Organization skills, abilities to work well under pressure.
- Open minded, hard working and fast learning.

EXPERIENCE

MARCH 2022 - NOW	Front-end Developer

DELIVEREE LOGISTICS WEB APP

Description: Southeast Asia's leading delivery logistics platform to book a wide range of vehicles to transport goods.

Responsibilities:

- Add new features and fix bugs.
- Work with the back-end team to analyze the API that's needed to use in the project.
- Optimize and improve the source code.

Technologies: ReactJS, Ruby, Sentry, Firebase, Google Map, Docker.

OCTOBER 2021 - NOW	Full-stack Developer

DELIVEREE SHOPIFY PLUGIN

Description: A web-app's plugin to provide the delivery services by connecting the users with Deliveree's drivers on Shopify.

Responsibilities:

- Add new features and fix bugs.
- Create API that's needed to use in the project and integrate it with the UI.
- Work with Shopify's APIs to connect the plugin with Shopify's stores.
- Optimize and improve the source code to make the plugin better.

Technologies: ReactJS, NodeJS, TypeScript, Docker, Ant Design, Google Map, Shopify Services.

JULY 2021 - SEPTEMBER 2021	Front-end Developer

SOS MAP

Description: An application to connect the people in difficulty with the donors during the Covid-19 pandemic.

Responsibilities:

- Setup a new source code then add all features.
- Optimize code to avoid the bad performance due to show more than 10,000 markers on the map.

Technologies: ReactJS, Ant Design, Styled Components, Goong Maps (goong.io)

JULY 2020 - SEPTEMBER 2021	Front-end Developer

CS9 CRYPTOCURRENCY EXCHANGE

Description: The CS9's exchange application for crypto trading. It allows the users to buy and sell the crypto in minutes.

Responsibilities:

- Add new features and fix bugs.
- Work with the back-end team to integrate APIs with the UI.

Technologies: ReactJS, Golang, Ant Design, Styled Component, Websocket, Docker.

SEPTEMBER 2018 - JUNE 2020	Front-end Developer

CAR PARKING MANAGEMENT

Description: An desktop's application to give professional management for car parking. Includes: parking fee collection, parking guides and solving the congestion in the parking lot.

Responsibilities:

- Setup ElectronJS source code, add new features and fix bugs.
- Cooperate with the back-end team to integrate APIs with the UI.

Technologies: ElectronJS, NodeJS, Ant Design, Websocket.
